

## ACS - Support #130

### Test ACS VM - install problem

11/16/2012 06:26 PM - Massimo Trifoglio

<b>Status:</b>	Closed	<b>Start date:</b>	11/16/2012
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	Joseph Schwarz	<b>% Done:</b>	100%
<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Description</b>			
Ho compilato un progetto con successo, ma poi l'installazione mi ha dato errore:			
11:58:35 Build of configuration Default for project DAQ_ACS			
make install			
.....includes:			
daqComponentImpl.h			
cp: cannot create regular file `/alma/ACS-10.2/ACSSW/include/./daqComponentImpl.h': Permission denied			
chmod: cannot access `/alma/ACS-10.2/ACSSW/include/./daqComponentImpl.h': No such file or directory			
make: *** [install_include_daqComponentImpl.h] Error 1			
11:58:37 Build Finished (took 1s.983ms)

\$ACSROOT e' read-only. Tutti i tuoi files dalla compilazione vanno sotto \$INTROOT; se \$INTROOT non e' stato definito, il sistema incontra un errore di permessi quando cerca di fare l'installazione sotto \$ACSROOT.

Dalla pagina Wiki per il corso di ACS ad Asiago:

<http://astri.me.oe-brera.inaf.it/Astri/view/Main/WorkshopEnvSetup>

You better source the \$HOME/.acs/.bash\_profile.acs from your \$HOME/.bashrc. Therefore add the following lines to \$HOME/.bashrc:

```
export INTROOT=$HOME/introot
source $HOME/.acs/.bash_profile.acs
```

Run the following command(s) to create an integration root area for your personal account (INTROOT defined above):

```
rm -rf $INTROOT
getTemplateForDirectory INTROOT $INTROOT
```
